

RIFKI MAULANA

rifkimln446@gmail.com | <https://rifkimln446-alt.github.io/rifkiimaa-Portofolio/>

SUMMARY

Industrial Engineering graduate from Universitas Singaperbangsa Karawang with experience in engineering projects, technical data analysis, warehouse planning, and process improvement. Experienced in interpreting technical data, preparing engineering documentation, coordinating multidisciplinary projects, and supporting operational improvements. Proficient in Microsoft Excel, AutoCAD, SketchUp, and technical reporting. Possess strong analytical thinking, leadership, problem-solving, and adaptability with a high willingness to learn railway engineering standards, technical survey methodologies, and infrastructure inspection.

CORE COMPETENCIES

Engineering Analyst	Project Coordination	M. Office (M. Excel)
Leadership & Decision Making	Design (AtuoCAD & SketchUp)	Process Improvement
Technical Survey Support	Data Analyst & Reporting	Warehouse & Inventory Optimize

EXPERIENCE

PT Toyota Motor Manufacturing Indonesia

December 2024 - January 2025

- Analyze warehouse inventory and operational data to identify root causes of stockouts (RedPost), support data-driven inventory planning and warehouse optimization.
- Analyze capacity, implement demand forecasting, and evaluate inventory to improve material availability and operational efficiency.

PT Summit Adyawinsa Indonesia

August 2025 - November 2025

- Support warehouse and PPIC activities by monitoring inventory, verifying material data, and assisting with production planning.
- Conduct inventory analysis and demand forecasting to improve stock accuracy, which is then displayed in M. Excel.
- Recreate warehouse layouts using SketchUp software, including detailed inventory and component details.
- Create customer location dashboards using Power BI software.

PT Lakon Cipta Teknologi

November 2025 - February 2026

- Create automation projects by collecting and analyzing operational data to identify process bottlenecks and improvement opportunities using plant simulation software.
- Prepare technical documentation, monitor project progress, and create reports using PowerPoint presentations.
- Collaborate with multidisciplinary teams to implement process improvement initiatives and ensure project objectives are achieved.

EDUCATION

University Singaperbangsa Karawang

August 2022 - July 2026

Bachelor of Industrial Engineering

GPA: 3.59/4.00

- Relevant Coursework: Project Management, Engineering Economics, Facility Layout Planning, Production Planning & Inventory Control, Supply Chain Management, Quality Engineering, Operations Research, Manufacturing Systems.
- Academic Projects: Conducted warehouse optimization and inventory planning projects using engineering analysis and data-driven decision-making approaches, Designed facility layouts and engineering models using AutoCAD and systematic layout planning methods.

ADDITIONAL INFORMATION

- Languages:** English, Japan.
- Certifications:** Professional Data Analyst & Power BI, Division Head Kominfo (Himpunan Mahasiswa).
