EDUCATION

2022 - 2026

**Singaperbangsa Karawang
University**

- Bachelor of Industrial Engineering
- GPA: 3.59

SKILLS

- Microsoft Office
- M. Excel (Pivot Table, VLOOKUP, Data Processing)
- Data Analysis
- Reporting & Documentation
- Workforce Planning (Basic)
- Recruitment Administration (Basic)
- Communication
- Leadership
- Team Collaboration
- Problem Solving
- Adaptability

LANGUAGE

English (Basic)

Indonesia (Fluent)

RIFKI MAULANA

Industrial Engineering graduate from Universitas Singaperbangsa Karawang with a strong foundation in operations management, supply chain, and process improvement. Experienced in analyzing operational and inventory data, demand forecasting, warehouse optimization, and reporting through internships and engineering projects within the manufacturing industry. Proficient in Microsoft Excel (Pivot Tables, Lookup Functions, Data Processing, and Reporting), AutoCAD, SketchUp, and Microsoft Office to support data-driven decision making and operational planning. Possess a solid understanding of Lean Manufacturing, Continuous Improvement, and Industrial Engineering principles, with the ability to identify process inefficiencies and develop practical improvement recommendations. An analytical, adaptable, and detail-oriented individual with strong communication and collaboration skills, committed to delivering continuous improvement and operational excellence.

EXPERIENCE

2024 - 2025

PT. Toyota Motor Manufacturing Indonesia

Warehouse Planning & Data Analyst Warehouse Intern

- Analyze inventory and warehouse operational data to identify the root causes of stockout (RedPost) occurrences.
- Conducted forecasting and demand analysis to improve inventory planning accuracy and support material availability.
- Evaluated warehouse capacity utilization and proposed improvement strategies to balance actual demand and storage capacity.
- Prepared analytical reports and recommendations to reduce the risk of overstock and stockout conditions.

2025

PT. Summit Adyawinsa Indonesia

Warehouse & PPIC Intern

- Supported warehouse operation through FIFO implementation and inventory monitoring activities.
- Conducted warehouse layout improvement initiatives to increase storage efficiency and material flow effectiveness.
- Performed part number verification and inventory documentation to maintain data accuracy.
- Developed daily towing and forklift schedules to support smooth warehouse and production operations.
- Assisted PPIC activities by conducting demand forecasting and supporting production planning processes.

2025

PT. Lakon Cipta Teknologi

Industrial Engineering Project Assistant

- Participated in a warehouse improvement project at PT. Polytron (Demak) focusing on bottleneck identification and process optimization.
- Supported the development of improvement process improvement initiatives and monitor project progress.
- Collaborated with project stakeholders to implement process improvement initiatives and monitor project progress.

Present

Dwi Desain

Freelance Design Greenhouse

- create a greenhouse design starting from the reservoir room, sterile room, to calculating the RAB

CERTIFICATION

- TOEFL Certification Score 427 SEPT
- Accounting and English competition certificates
